

# SSC<sup>®</sup> *SYSTEM SAFETY CERTIFICATE*

Would you like to remove doubts about usage of non original mechanical parts?  
Would you like to have the certainty that the part you are looking at is your?  
Would you like to know it in real time?

Definitive solution exist...

A unique and patented system that can determinate in real time if a part is exactly in the place it is expected to be.

With a simple gesture, through the reading of a QR Code, SSC will immediately show a part's intended location

The user could establish in real time if a part is original or not.

furthermore the system provide, through the usage of a password, the correct visualization of traceability of the component, it's provenance with all various passages from producer the customer, certificates, designs and various notes

### Simple example:

^ Certificate stored online

^ At the same time the certificate is linked to trasport document/component through QR-Code

^ Certificate paper copy is comparable with the one stored on SSC website

SSC DATABASE

QR -Code

Transport documentation or  
component

# Process example:
